Pocket Spring Unit

INDEX

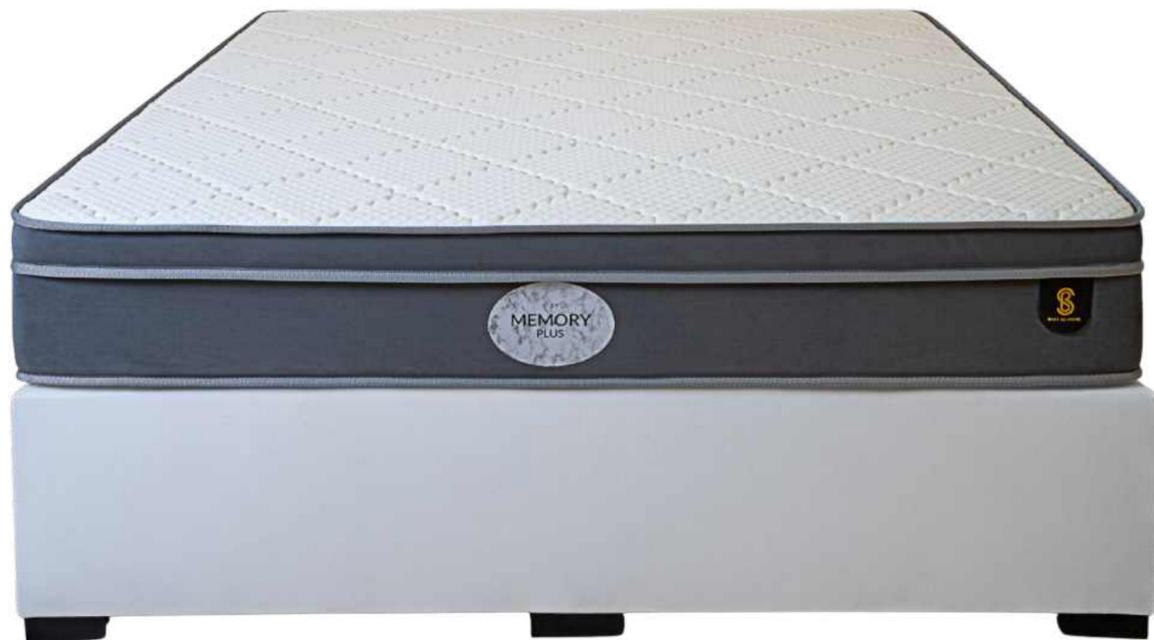

The innerspring unit comprises of “Pocketed Springs”. Each Barrel Shaped innerspring is manufactured from High Tensile Carbon Steel Wire of 14 gauge, having a dia. of 1.9 mm. The 160 mm height spring has 6.5 convolutions, with a spring dia. of 55 mm. Each of such individual spring is given proper heat treatment to achieve the ideal resiliency. They are then “Pocketed” ∞ encased in individual 80 gsm Fibretex Pockets, to allow independent compression of each spring. These are joined together with hot melt glue. It is machine glued (not hand glued) to ensure its longevity.
